Camwood's Service Offerings

Windows 11 Readiness

Camwood's Windows 11 Readiness service ensures a smooth transition to Windows 11 by assessing device and application compatibility, conducting hardware checks, and providing a comprehensive readiness audit. The service includes automated application smoke testing and mapping readiness to user groups to provide a clear remediation plan. It offers three key stages: Assess, Modernise, and Manage. The Evergreen Managed Service helps keep your IT and application estate up-to-date with features like Microsoft managed patching, application testing, and compliance reporting ([Camwood Limited](#)) ([Camwood Limited](#)) ([Digital Marketplace](#)) .

Azure Virtual Desktop (AVD)

Camwood's Azure Virtual Desktop service assists with the adoption and optimization of AVD environments. This service aims to reduce delays and costs associated with moving applications to AVD. It includes compatibility testing, modernization of applications, and ongoing management to ensure a seamless and secure remote working environment ([Camwood Limited](#)) .

Intune & Microsoft 365

The Intune & Microsoft 365 service helps organizations transition to these modern cloud-based solutions. Camwood provides advisory services, design, and migration planning, along with full migration support. This includes user, device, and application readiness assessments, modern workplace migration plans, and ongoing lifecycle management. Benefits include enhanced security, compliance, and mobile device management ([Camwood Limited](#)) ([Camwood Limited](#)) .

Application Lifecycle Consulting

Camwood's Application Lifecycle Consulting service offers comprehensive management of the entire application lifecycle. This includes deployment, maintenance, updates, and optimization to ensure applications remain effective and secure. The service helps integrate new technologies and manage the complexities of modern IT environments ([Camwood Limited](#)) .

Data Services

Camwood also provides data services aimed at improving data management, security, and compliance. These services are designed to support businesses in managing their data more efficiently and securely, aligning with modern regulatory requirements ([Camwood Limited](#)) .
